Computers On The Farm

February 8 and 9, 2021 from 6:00 p.m. to 9:00 p.m.

If you are a farmer who wants to make more effective use of your computer on your farm, this conference is designed for you!

Computers on the Farm is an annual event for all people interested in computer applications on the farm. This year's conference will be moving online for two evenings. Topics are planned for both beginning and advanced users. Demonstrations and discussion of computer technologies for farm applications are emphasized. Much of the conference consists of current farm users sharing experiences about computer applications they are using in their operations.

This year's topics include:

- Virtual Conferencing – Ins and Outs
- Advanced Spreadsheet Discussions
- Update on Farm Taxes
- Precision Ag and Drone Technologies – Updates / New Rules

- Monitoring the Farm from a Security Standpoint
- Farm Accounting -Update/Future
- Social Media – Utilization on the Farm
- Spearheading Digital Transformation of Rural America
- Starlink-Providing Broadband Internet Across the Globe

This year's conference will be online via ZOOM

With the conference moving to a virtual environment via ZOOM. Topics will be designed to provide demonstrations to simulate a hands-on experience for beginners and experienced farm computer users.

Registration fee of $20.00 will cover the access to both evenings, as well as recordings of each topic
